ZAŁOŻENIA BAZY DANYCH

Relacja STUDENT - CHARGE:

Jeden uczeń może być przypisany do wielu opłat.
 select count("STUDENT_ID"), "STUDENT_ID" from "CHARGE" group by "STUDENT_ID" having count("STUDENT_ID") > 1

| count | STUDENT_ID | |
|-------|------------|--|
| 2 | 3 | |
| 2 | 12 | |

2. Jedna opłata może być przypisana tylko do jednego ucznia.

 $\label{thm:charge_indep} \textbf{select count} (\texttt{"CHARGE_ID"}), \texttt{"STUDENT_ID"} \ \textbf{from} \ \texttt{"CHARGE"} \ \textbf{group by} \ \texttt{"CHARGE_ID"} \ \textbf{having count} (\texttt{"STUDENT_ID"}) > 1$

No rows returned

3. Nie można dodać opłaty bez połączenia jej z uczniem. insert into "CHARGE" ("CHARGE_ID", "AMOUNT_WITHOUT_INTEREST", "INTEREST", PAYMENT_DATE", "DESCRIPTION") values (16, 23, 2, '2018-09-14', 'id_card');

```
ERROR: null value in column "STUDENT_ID" violates not-null constraint
DETAIL: Failing row contains (16, 23, 2, 2018-09-14, id_card, nul
1).
```

Relacja STUDENT - FINAL_ASSESSMENT:

- 1. Jeden uczeń może być przypisany do jednego kompletu ocen końcowych.
- Jedna komplet ocen końcowych może być przypisany tylko do jednego ucznia.
 insert into "FINAL_ASSESSMENT" ("MATH", "CHEMISTRY", "HISTORY", "ENGLISH", "POLISH",
 "PHYSICS", "IT", "SCHOOL_YEAR", "STUDENT_ID") values (3, 4, 4, 4, 5, 5, 5, '2017/2018', 1);

```
ERROR: duplicate key value violates unique constraint "Unique_Iden tifier11"

DETAIL: Key ("STUDENT_ID")=(1) already exists.
```

3. Nie można dodać ocen końcowych bez połączenia ich z uczniem. insert into "FINAL_ASSESSMENT" ("MATH", "CHEMISTRY", "HISTORY", "ENGLISH", "POLISH", "PHYSICS", "IT", "SCHOOL_YEAR") values (3, 4, 4, 4, 5, 5, 5, '2018/2019');

```
ERROR: null value in column "STUDENT_ID" violates not-null constraint
DETAIL: Failing row contains (3, 4, 4, 4, 5, 5, 5, 2018/2019, nul
1).
```

Relacja STUDENT - SUBJECT:

- 1. Jeden uczeń może być przypisany do wielu przedmiotów.
- 2. Do jednego przedmiotu może być przypisanych wielu uczniów.
- Nie można dodać ucznia bez połączenia go z przedmiotem. insert into "STUDENT_SUBJECT" ("STUDENT_ID") values (1);

```
ERROR: null value in column "SUBJECT_ID" violates not-null constraint
DETAIL: Failing row contains (1, null).
```

4. Nie można dodać przedmiotu bez połączenia go z uczniem.

Relacja STUDENT - SPECIAL_INTERESTS_GROUP:

- 1. Jeden uczeń może być przypisany do wielu grup zainteresowań.
- 2. Do jednej grupy zainteresowań może być przypisanych wielu uczniów.
- 3. Można dodać ucznia bez połączenia go z grupą zainteresowań.
- 4. Można dodać grupę zainteresowań bez połączenia jej z uczniem.

Relacja **TEACHER - SUBJECT**:

- 1. Jeden nauczyciel może być przypisany do wielu przedmiotów.
- Do jednego przedmiotu może być przypisany jeden nauczyciel.
 insert into "SUBJECT" ("SUBJECT_ID", "SUBJECT_NAME", "SCHOOL_YEAR",
 "CLASSROOM_ID", "EMPLOYEE_ID") values (1, 'ENGLISH', '2018/2019', 101, 1);

```
ERROR: duplicate key value violates unique constraint "Unique_Iden tifier12"

DETAIL: Key ("SUBJECT_ID")=(1) already exists.
```

- 3. Można dodać nauczyciela bez połączenia go z przedmiotem.
- Nie można dodać przedmiotu bez połączenia go z nauczycielem.
 insert into "SUBJECT" ("SUBJECT_ID", "SUBJECT_NAME", "SCHOOL_YEAR",
 "CLASSROOM_ID") values (1, 'ENGLISH', '2018/2019', 101);

```
ERROR: null value in column "EMPLOYEE_ID" violates not-null constraint
DETAIL: Failing row contains (1, ENGLISH, 2018/2019, 101, null).
```

Relacja TEACHER - SPECIAL_INTERESTS_GROUP:

- 1. Jeden nauczyciel może być przypisany do wielu grup zainteresowań.
- 2. Do jednej grupy zainteresowań może być przypisany jeden nauczyciel.
- 3. Nie można dodać grupy zainteresowań bez połączenia jej z nauczycielem. insert into "TEACHER_SIG" ("BUDGET", "SIG_ID") values (5000, 15);

```
ERROR: null value in column "EMPLOYEE_ID" violates not-null constraint
DETAIL: Failing row contains (5000, 15, null).
```

4. Można dodać nauczyciela bez połączenia go z grupą zainteresowań.

Relacja SUBJECT - CLASSROOM:

- 1. Jedna sala może być przypisana do wielu przedmiotów.
- 2. Jeden przedmiot może być przypisany do jednej sali.
- 3. Można dodać salę bez połączenia jej z przedmiotem.
- Nie można dodać przedmiotu bez połączenia go z salą.
 insert into "SUBJECT" ("SUBJECT_ID", "SUBJECT_NAME", "SCHOOL_YEAR", "EMPLOYEE_ID")
 values (16, 'PE', '2018/2019', 15);

```
ERROR: null value in column "CLASSROOM_ID" violates not-null constraint
DETAIL: Failing row contains (16, PE, 2018/2019, null, 15).
```

Relacja SPECIAL_INTERESTS_GROUP - CLASSROOM:

- 1. Jedna sala może być przypisana do wielu grup zainteresowań.
- 2. Jedna grupa zainteresowań może być przypisana do jednej sali.
- 3. Można dodać salę bez połączenia jej z grupą zainteresowań.
- Nie można dodać grupy zainteresowań bez połączenia jej z salą.
 insert into "SPECIAL_INTERESTS_GROUP" ("SIG_ID", "SUBJECT_AREA") values (15, 'python programming');

```
ERROR: null value in column "CLASSROOM_ID" violates not-null constraint
DETAIL: Failing row contains (15, python programming, null).
```

OPIS (ALGORYTM) KONWERSJI Z MODELU E-R

Krok 1: Odwzorowanie zwykłych (silnych) zbiorów encji.

Dla każdego zbioru encji w modelu E-R tworzona jest odpowiadająca mu relacjna w modelu relacyjnym. Utworzona relacja będzie zawierała wszystkie atrybuty proste zbioru encji, z którego powstaje.

Krok 2: Odwzorowanie słabych zbiorów encji.

Dla każdego słabego zbioru encji tworzona jest relacja zawierająca wszystkie proste atrybuty zbioru encji. Jednak w przypadku przedstawianego projektu nie mamy do czynienia z żadnym słabym zbiorem encji, dlatego ten krok pomijamy.

Krok 3: Odwzorowanie binarnych związków 1:1.

Opiera się na wykorzystaniu klucza obcego. Wybierana jest jedna z relacji odpowiadających jednemu ze zbiorów encji konkretnego związku i należy w niej umieścić dodatkowy atrybut (lub atrybuty) klucza obcego, który wskazuje na klucz głównej drugiej z relacji tego związku.

Krok 4: Odwzorowanie binarnych związków 1:N.

Należy wybrać relację będącą w związku po stronie N, a następnie wstawić do niej dodatkowy atrybut (lub atrybuty) klucza obcego, który wzkazuje na klucz gówny relacyjny będącej w związku po stronie 1.

Krok 5: Odwzorowanie binarnych związków M:N.

Należy stworzyć nową relację przeznaczoną dla tego związku. Nowo utworzona relacja powinna posiadać klucz obce, które wskazuje na klucze główne zbiorów encji będących w tym związku. Podobnie należy postąpić w przypadku związków posiadających własne atrybuty.

Krok 6: Odwzorowanie atrybutów wielowartościowych.

Dla każdego atrybutu wielowartościowego należy utworzyć nową relację. Nowo utworzona relacja będzie zawierać atrybuty odpowiadające wielowartośiowemu atrybutowi zbioru encji i atrybutom klucza głownego relacji reprezentującej zbiór encji posiadający ten atrybut wielowartościowy.

Krok 7: Odwzorowanie dziedziczenia.

W przypadku przedstawianego projektu mamy do czynienia z dziedzieczeniem obowiązkowym, rozłącznym. Oznacza to, że dla każdej z podklas należy utworzyć nową relację, która będzie zawierać wszystkie atrybuty nadklasy oraz atrybuty związane wyłącznie z daną podklasą, jeśli takie istnieją.

MODYFIKOWANIE DANYCH

Dane należy modyfikować zgodnie ze schematem:

update NAZWA_TABELI

set NAZWA_KOLUMNY = WARTOSC, NAZWA_KOLUMNY_2 = WARTOSC2, ...

where WARUNEK

Modyfikowania danych na przykładzie tabeli "STUDENT":

| STUDENT_ID | SURNAME | NAME | DATE_OF_BIRTH | FORM | STIPEND |
|------------|---------|--------|---------------|------|---------|
| 16 | Johnson | Thomas | 2008-01-17 | 4A | false |

update "STUDENT" set "FORM" = '4B', "STIPEND" = true where "STUDENT_ID" = 16

| STUDENT_ID | SURNAME | NAME | DATE_OF_BIRTH | FORM | STIPEND |
|------------|---------|--------|---------------|------|---------|
| 16 | Johnson | Thomas | 2008-01-17 | 4B | true |

USUWANIE DANYCH

Dane należy usuwać zgodnie ze schematem:

delete from NAZWA_TABELI

where WARUNEK

Usuwanie danych na przykładzie tabeli "CLASSROOM":

| CLASSROOM_ID | COMPLEX |
|--------------|---------|
| 116 | 3 |

delete from "CLASSROOM" where "CLASSROOM_ID" = 116;

| select * from " | CLASSROOM" where "CLASSROOM_ID" = 116; | ; |
|-----------------|--|------------------|
| Table queries ▼ | Previous queries ▼ | |
